Since bending it to suit your needs should not be a difficult task5 steps to create a maintenance message in MS WordStep 1: Create a cover pageOpen a new document in MS Word and write the title. The header must contain information about what is created in the maintenance report. Write your company name and enter the logo as well. Write down the information as well as, for example, the address of contact information, email, etc. Step 2: Cover letter on the next page is included in the cover letter. Depending on who your client is, the person may not be able to understand the technical information that you may present later. Therefore, briefly write down the results of the test in the cover letter. Mention what is needed for repairs and other such basic information. Step 3: Write down all the information related to the device or machine in the next section of the device information. List all ingredients and write down the condition they are in. You may want to create a table for this purpose, as it will help you present and record information more effectively. Step 4: New Parts Cost DetailsSe type the parts that need repair. Some parts may require a complete replacement. In each case will be charged. It's convenient just to insert information into this document. Please indicate clearly and separately each of the tariffs. Write the total cost involved and consider including it in the cover letter. Step 5: Suggestions and SignatureDespite repair some parts could be something about the customer's deal that he can do to squeeze some extra performance out of the machine. Also, you may have noticed some negligence on the client's part, which you might want to point out to him so that his machine lasts longer. Finally, put your name and signature at the bottom.4.
